Professional summary

Motivated and detail-oriented Software Engineering Undergraduate with hands-on experience in MERN stack development using **MongoDB**, **Express.js**, **React**, and **Node.js** as well as **Go (Golang)** and **MySQL** with knowledge of JWT authentication, REST APIs, and full-stack application development. Skilled in building responsive web applications, database management, and problem-solving, with a strong interest in software development and modern technologies.

EDUCATION

University of Bedfordshire (SLIIT)	2023 July – 2027
BSc. Computer Science	
Data Science and Software Engineering Foundation (SLIIT)	
Primary and Secondary Education	2012 – 2023
Sri Sumangala College	Wariyapola

PROJECTS

1. LankaStay Map – Student Accommodation Platform

- Developed a full-stack student accommodation platform to find rentals near universities using an interactive map interface.
- Implemented JWT-based authentication with role-based access (student, owner, admin).
- Built property management system with image uploads, availability tracking, and occupancy status.
- Integrated Leaflet (OpenStreetMap) for location-based search and map pinning.
- Developed admin dashboard for approvals, user management, and analytics.
- Used MongoDB geospatial queries for location-based filtering.

Tech Stack: React, Go, MongoDB, Tailwind CSS, Leaflet, JWT

2. Nova AI – Voice Controlled Desktop Assistant

- Built a voice-controlled Windows assistant activated by the wake word “Hi Nova”.
- Implemented 20+ voice commands for app control, system operations, and media playback.
- Designed multi-threaded architecture for smooth, non-blocking performance.
- Integrated OpenAI API for conversational fallback responses.
- Developed a PyQt5 GUI with system monitoring and command history.

Tech Stack: Python, PyQt5, Speech Recognition, pyttsx3, Open AI API, psutil, pygame

3. Sigma – Online Learning Management System (LMS)

- Developed a full-stack Learning Management System (LMS) with dedicated student, teacher, and admin dashboards.
- Implemented secure JWT authentication, OTP-based email verification, and role-based access control.
- Enabled course enrollment, video and PDF uploads, search functionality, and a fully responsive user interface.
- Built admin features for user and course management using REST APIs and MongoDB Atlas.

Tech Stack: MongoDB, Express.js, React, Node.js, JWT, Tailwind CSS, Cloudinary, REST APIs, AWS

4. RIK Restaurant Website (MERN)

- Developed a full-stack restaurant management web application with separate client and admin portals.
- Implemented secure JWT authentication, dynamic menu management, shopping cart functionality, and an admin dashboard for restaurant operations.
- Designed responsive user interfaces and optimized backend APIs for smooth user experience.

Tech Stack: React, Node.js, Express.js, MongoDB

Skills

- **Programming Languages & Web Technologies:** React, Node.js, Java, Go, Python, R, Tailwind CSS, HTML, CSS3, JavaScript
- **Cloud Computing:** AWS, Vercel, Railway
- **Containerization & Orchestration:** Docker
- **AI & Developer Tools:** Cursor AI, Claude, ChatGPT, AI-assisted software development
- **Object-Oriented Programming (OOP):** Strong understanding of Java and OOP concepts
- **Databases:** MongoDB, MySQL
- **Operating Systems:** Windows, Linux/Unix-based systems
- **Version Control:** Git
- **Data Analytics & Visualization:** Microsoft Power BI, DAX queries, report generation, data analytics
- **Scripting:** Shell Scripting, PowerShell
- **Soft Skills:** Team Collaboration, Project Management, Analytical Thinking, Documentation
- **Languages:** English, Sinhala
